What is different and why:

- 1/ inside diameter is different because axle diameter D042SB is smaller as axle D662SB.
- 2/ different bearings 6001 for D042SB and 6902 for D662SB
- 3/ different diameter of inside busher
- 4/ different weight 166g for D042SB and 152g for D662SB
- 5/ different rubber seal from side cup side

Note:

Both cassette body use the same black water resistant oil rubber seal from hub side.
