

BMX SYSTEMS

O.R.S.T. / Flip-Flop / O.L.S.T. / L.S.D.

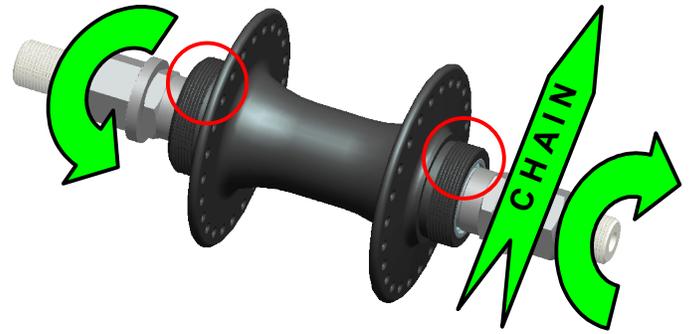

O.R.S.T. = One Right Side Thread

Is threaded at Right Side of hub and the thread direction is the same with Clock Direction.

Chain is used also on Right Side of bike as standard bikes.

This hub is good for left hand riders or for standard bikes.

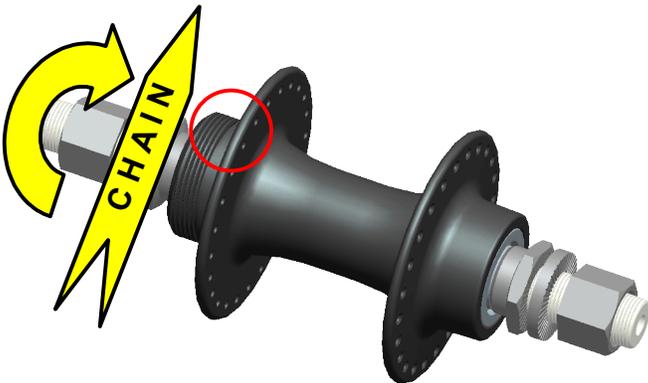

FLIP-FLOP

Is threaded at Right Side and Left Side of hub and the thread is Clockwise at both sides of hub.

Chain is used also on Right Side of bike as standard bikes only.

Standard Flip-Flop is 1.37" + M30

This hub is good for left hand riders or for standard bikes and rider can mount at hub sprocket to each side with different number of teeth and later easy exchange to sprocket which he wants to use.

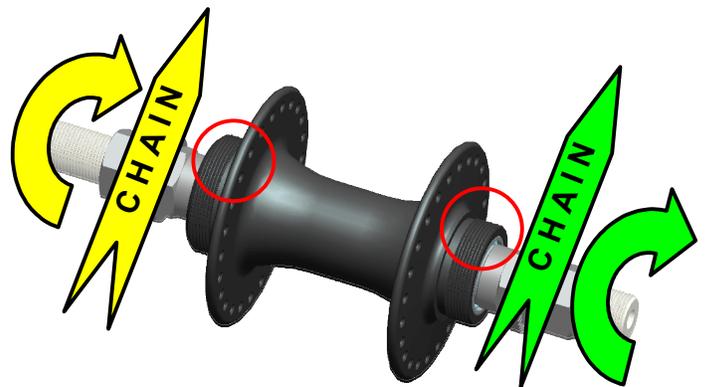

O.L.S.T. = One Left Side Thread

Is threaded at Left Side of hub and the thread is Counter Clockwise.

Chain is used at the Left Side of bike.

Right hand riders jump and touch with Pegs and Crank at right side of bike, so they can protect transmission parts, because they are at the left side of bike.

L.S.D. = Left Side Drive

This is combination of O.L.S.T. with O.R.S.T. in one hub.

Good for left and right hand riders and for standard bikes and for bikes with chain at left side as well.
